

Initialization Stage

Like many skin specialists, Doctor Allouche believes that the epidermis is central to skin care. It is the skin's outer layer and the ultimate barrier which protects the integrity of our inner world. The epidermis' noble functions must be respected and it should receive customized treatment applied according to a precise and rigorous ritual. At Biologique Recherche we believe this stage is essential.

► Cleansers

Eau Micellaire Biosensible

Removes make-up and soothes

100mL ¥10,450

[How to use]

Take an appropriate amount on cotton and gently remove make up.

Treatment Stage

During this stage, products containing the highest concentrations of active ingredients are applied to “recondition” the epidermis and help activate both its regenerative properties and those of the skin’s deeper structures. The skin is a complex organ designed for protection and communication that regenerates miraculously every month throughout our entire lives. The unique benefits of these cutting edge, customized skin care treatments are both immediate and lasting, even for particularly imbalanced “Skin Instant”

► Serums (Please use it within six months after the opening)
